Enterprise Discovery™

Dramatically reduce the time, cost and effort of e-discovery and investigation preparedness
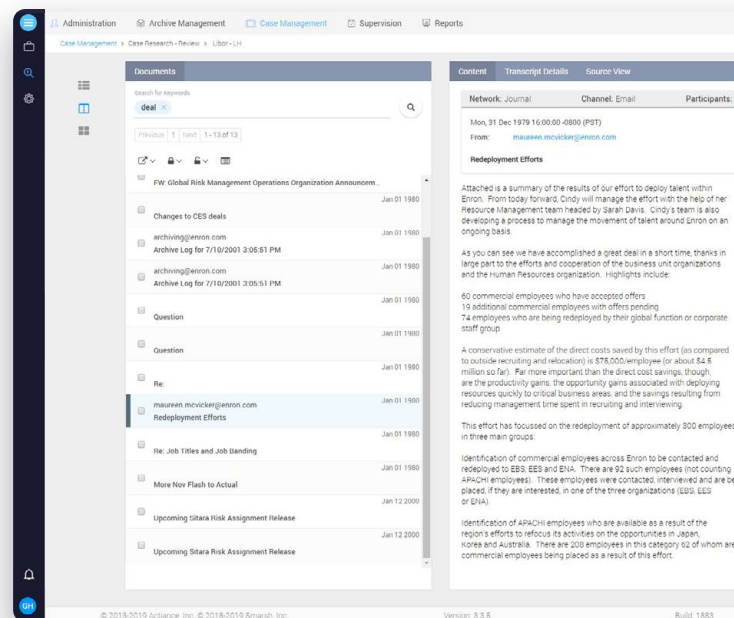

The Challenge

At a moment's notice and under tight deadlines, organizations have to produce electronic communications content for litigation, regulatory requests, internal investigations and audits. E-discovery continues to be disruptive and expensive. Organizations are under pressure to improve the speed and efficiency of search, preservation and review against their entire corpus of archived content.

The Solution

Enterprise Discovery gives clients the ability to control the total cost of managing large volumes of data. Users can quickly collect, organize and reduce data to enable informed strategic decisions during early case assessment, while managing risk. Enterprise Discovery provides a highly secure, defensible and auditable workflow across all electronic communications.

Key Benefits

✓ Support for 80+ channels in full conversational context

✓ Unified user identities across all channels

✓ Rapid, faceted search by channel, user, message direction and other criteria

✓ Multiple export formats including EML, MSG, PST, HTML and XML with EDRM export manifest

✓ Cases to organize collected data, with reviewers able to work on multiple cases simultaneously

✓ Automated, one-click legal hold functionality

✓ Fast access to relevant content

✓ Complete audit trail and reporting

Enterprise Discovery™

Dramatically reduce the time, cost and effort of e-discovery and investigation preparedness

Key use cases

Responding to litigation requests
Rapidly cull, analyze, and assess information across a broad range of content, all preserved securely in evidentiary quality.

Preparing for investigations
Easily manage categories of content for internal investigations, FOIA requests and audits. Carry out e-discovery reviews, assign tags and annotate content.

Meeting preservation requirements
Instantly add content to a case and place a legal hold on the case to retain that data for as long as needed. Apply custodian as well as document level holds.

Streamlining process & reducing cost
Combine powerful hold, search, review, and export capabilities within one platform for maximum efficiency and cost savings.

Managing security & risk
Limit handoffs between vendors and technologies with a single, secure repository for all electronic communications content.

Enterprise Discovery integrates seamlessly with the Enterprise Archive

Enterprise Archive

An archive architected for scalability and performance

Unlike legacy email archives, Enterprise Archive preserves full conversational context across 80+ communication channels, enabling real-time interactivity, knowledge and data insights. The archive scales to meet each client's specific requirements and performance goals. It can be scaled up or down as data volume changes, with no impact to system performance with your organization across ingestion, search, review and export. The Enterprise Archive integrates seamlessly with Connected Capture, Connected Apps, and your technology ecosystem.
