

Intelligent Agent

Cut Costs and Catch More Risks with Smarth AI.

The challenge: Outdated surveillance systems are under pressure

Compliance teams face increasing pressure to modernize their surveillance efforts. Excessive false positives, rising operational costs, and increasingly complex global regulations push legacy systems to their limits. Traditional lexicon-based approaches cannot provide the accuracy, speed, or scale required in today's communication environment.

The solution: Smarth Intelligent Agent

Smarth Intelligent Agent emulates the decision-making of a Level 1 Compliance Analyst to reduce false positives, surface more real risks, and scale across global communications. It integrates with existing Enterprise Conduct workflows to boost efficiency, cut costs, and keep you ahead of evolving regulations.

Built on a decade of real-world AI innovation. Designed to do it better.

Intelligent Agent takes everything Smarth has learned and levels it up with:

- Developed with insights from real compliance analysts through exclusive industry partnerships
- Fine-tuned language models deliver sharper, context-rich results
- Team of AI experts behind it, with more than eight publications on AI and LLMs
- Built-in trust – no third-party data processing means more control and better outcomes

Customer-proven results

A top global investment bank put Intelligent Agent to the test. The impact?

- **77% reduction** in workload across millions of alerts
- **Less than 2%** of risk signals lost

Key benefits:

Cut labor costs, not corners: Slash false positives so your team focuses on real risk with Contextual AI Filter

See what matters faster: Find three to five times more risks with Detect Scenarios for financial and compliance misconduct.

Expand risk coverage globally: Spot risk across key channels and languages with built-in multilingual coverage.

77%

reduction in workload across millions of alerts

< 2%

of risk signals lost

Enterprise Conduct with Intelligent Agent offerings
